Cleanfix®

Cleanfix REVERSIBLE FAN; reverses airflow automatically at full engine rpm to provide maximum radiator cleaning. The fan blades also automatically adjust airflow with temperature optimizing the cooling performance; increasing airflow for the hot summer months and decreasing the airflow for the cold winter months. The VP-SERIES fan provides substantial fuel savings, reduces warm up times and allows for more usable engine power, while increasing daily productivity.

RAWLINGS WOOD HOGS ™

The Original rotary hog was invented and developed by Rawlings Manufacturing in 1977. Since then our company has manufactured and marketed several series of product lines. We offer these machines in stationary, portable and skid mounted systems; both vertical and horizontal models are available. In house engineering is available to provide turnkey operations.
